

INTERNAL/EXTERNAL POSTING

JOB OPPORTUNITY

Pattison Sign Group, one of the largest signs and visual communication manufacturers in North America, is looking for a qualified person to fill the following position remotely and/or at its Edmundston, NB office:

TECHNICAL DESIGNER (engineering)

Summary:

The technical designer analyzes and evaluates drawing requests, prepares and produces the engineering drawings according to the requirements of the customer, the production team and the building code. He gathers the related technical information and transmits to the project manager for the production process to start.

General responsibilities :

- Evaluate projects in order to determine the installation site conditions and in order to comply with applicable codes;
- Use the calculation tools in place to comply with the various applicable building codes;
- Calculate and develop drawings of self-supporting structure, concrete base as well as method of attachment for wall signs;
- Perform and save engineering drawings so that:
 - The estimation team is able to establish a manufacturing price;
 - The permit team can confirm the information required to obtain the installation permit;
 - The technical production drawing respects the conditions established at the outset;
 - The project manager follows the installation methods.
- Coordinate with an external engineering firm as needed;
- Provide ongoing support for other departments including sales, estimation, production design and project managers;
- May be requested to participate and/or coordinate coordination meetings with internal and/or external parties.

Requirements :

- University or college diploma in civil engineering or industrial design or relevant experience;
- Very good knowledge of computer systems and drawing software, such as SolidWorks/ AutoCAD/ Corel or other;
- Ability to communicate in writing and/or verbally in French and/or English, in a professional and precise manner, the progress, challenges and solutions of projects;
- Be versatile and know how to work in a team environment;
- Good knowledge of ISO 9001 quality standards and CSA and / or UL electrical certifications;
- Excellent ability to read plans / measurements / structures;
- Sense of organization, observation, initiative and autonomy;
- Can work outside normal office hours;
- Must have all required documents to legally work in Canada;

Adaptability, resourcefulness, leadership qualities and knowledge/experience in the sign industry would be an asset for applicants.

Pattison Sign Group offers benefits, competitive wages and is an Employment Equity compliant employer.
